

Budgerigars (also known as the common parakeet or, affectionately, “budgies”) are the third most popular pet worldwide, after dogs and cats, but they don’t appear to be great at surviving

Although native to South America, **monk parakeets** (also known as Quaker parrots) have been quite successful in colder climes, even NYC

The **rose-ringed parakeet** has successfully colonized numerous countries in Northern and Western Europe, South Africa, Japan, Florida, California, and Hawaii in the
